

24.3.25

Task 1 : Create 5 News Article Pages in AEM

Creating news articles in Adobe Experience Manager (AEM) involves using its rich content management capabilities to efficiently publish and manage content. Here's a general overview of the process:

Step 1: Log into AEM

- Open your browser and go to the AEM login page.
- Enter your credentials to access the AEM dashboard.

Step 2: Navigate to the Sites Console

- In the AEM interface, click on “**Sites**” from the left-hand navigation panel.
- This will show the list of existing pages and folders.

Step 3: Create a New Page

- Click the “Create” button (usually at the top of the Sites console).
- Select “Page” from the options.
- Choose a suitable template for news articles (like "News Article" or "Article Template").
- Enter a Page Title (e.g., “Latest Tech Trends”).
- Click “Create”.

Step 4: Add Content to the Article

- Open the newly created page by clicking on it.
- Click “**Edit**” to enter the page editor.
- Use components to add content:
 - **Text Component:** For the headline, sub headline, and article body.
 - **Image Component:** To add relevant images.
 - **Teaser Component:** For a brief summary if needed.
 - **Date/Time Component:** To display the publication date.
- Publish the Article

Code

```
<div class="news-article">  
  
  <h1>${currentPage.title}</h1> <p class="author">By ${properties.author}</p>  
  
  <p class="publish-date">${properties.publishDate}</p>
```

```
<div class="content">
```

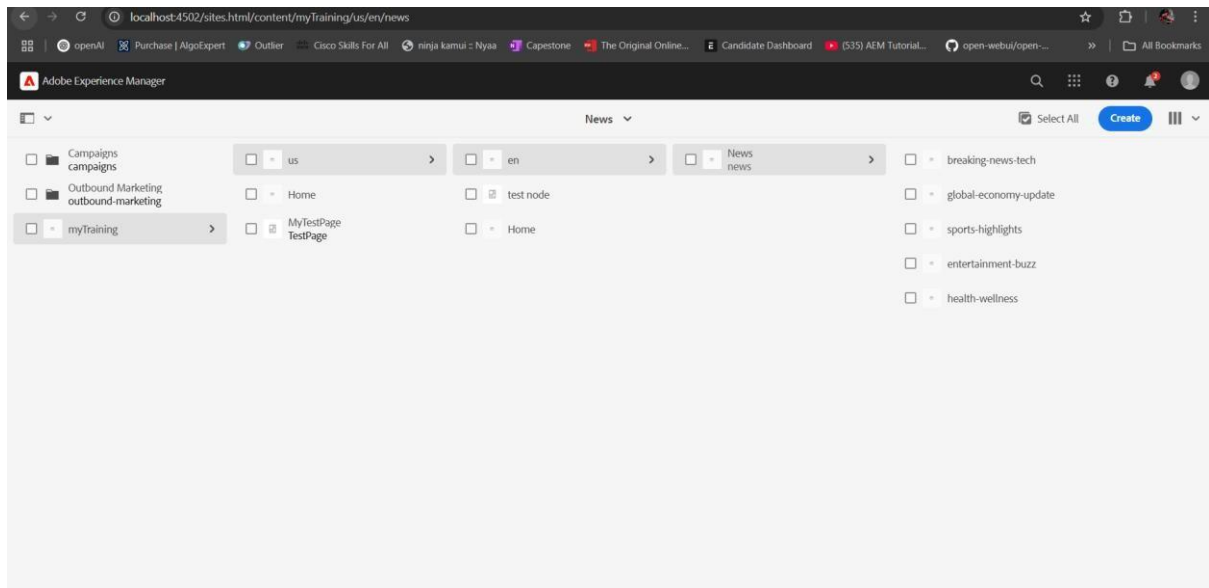

```
    ${properties.content}
```

```
</div>
```

```

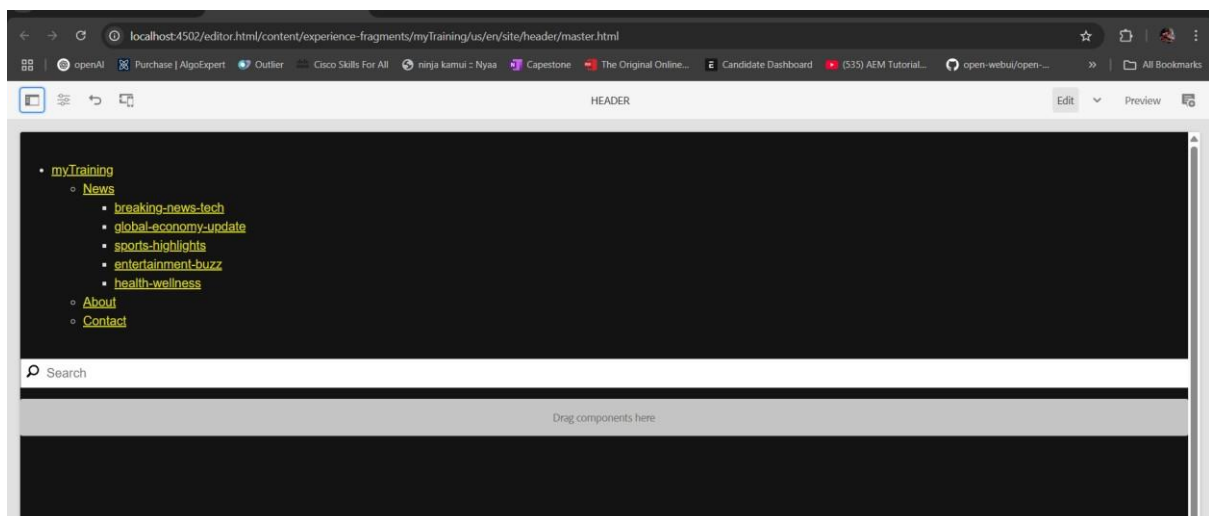

```

```
</div>
```

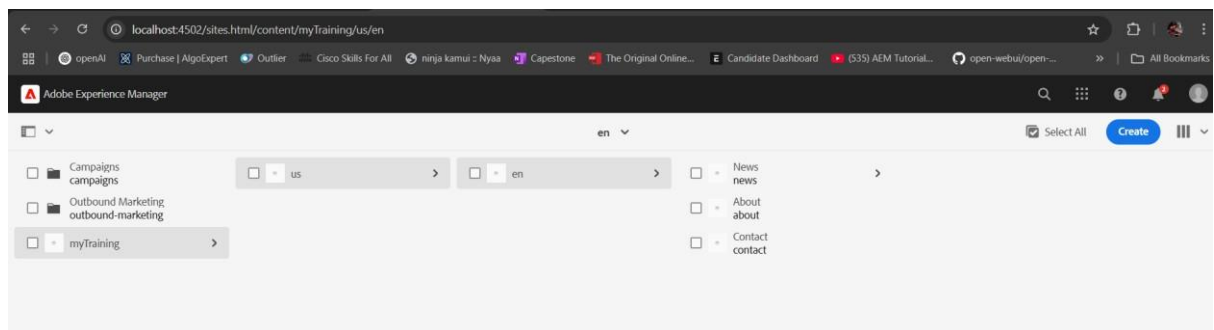

Task 2 :Create Header Experience Fragment and Use These Pages as Menu

- Log in to AEM.
- Go to AEM Sites → Experience Fragments.
- Click Create → Experience Fragment.
- Name it “Header Menu” and choose a suitable template (e.g., "Header Template").
- Click Create.

Task 3: Create "Contact Us" and "About Me" Pages

- Log in to AEM.
- Go to Sites → Your Website Folder (e.g., /content/site).
- Click Create → Page.
- Select a template
- Enter the page title:
- "Contact Us"
- "About Me"
- Click Create.

Task 4: Create Footer Experience Fragment with 4 Sections

- Log in to AEM.
- Go to AEM Sites → Experience Fragments.
- Click Create → Experience Fragment.
- Name it “Footer Section” and choose an appropriate template (e.g., "Footer Template").
- Click Create.
